Nonprofit Goals

TEACHING

Teaching high school students personal finance and investing through an 8-week curriculum and real-life investing

CONNECTING

Bridging the financial learning gap by connecting students with college tutors and educational resources

TRANSPARENCY

Facilitating communication, feedback, student metrics, and centralization

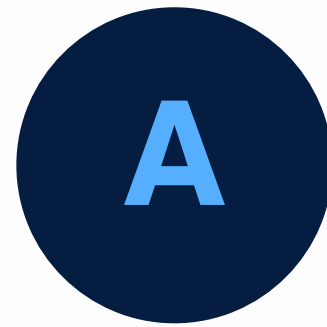

Our Value Proposition

Our website and mobile app create a centralized platform and seamless experience for high school students and educators alike to bridge the financial literacy gap.

CENTRALIZED

Common log in page that dynamically creates various user accounts and reroutes to user landing pages

ACCESSIBLE

Mobile app functionality for high schoolers with curriculum material, practice questions, and specialized finance calculators

STREAMLINED

Attendance tracker, office hour scheduling, student metrics, and feedback form built-in

HELPFUL

Allows tutors & schools to find mutual times, and automates paper assignments and grading

Workflow & Tech Stack

We used a MERN Stack and Material UI for a Web Application, along with Swift + SwiftUI on the side for a simple Mobile implementation of the web app.

First Generation
INVESTORS

1. Data

Used MongoDB and dynamic data documents to store user data, including locational, demographic, and personal information for students, tutors, teachers, and FGI admin.

2. Web Pages

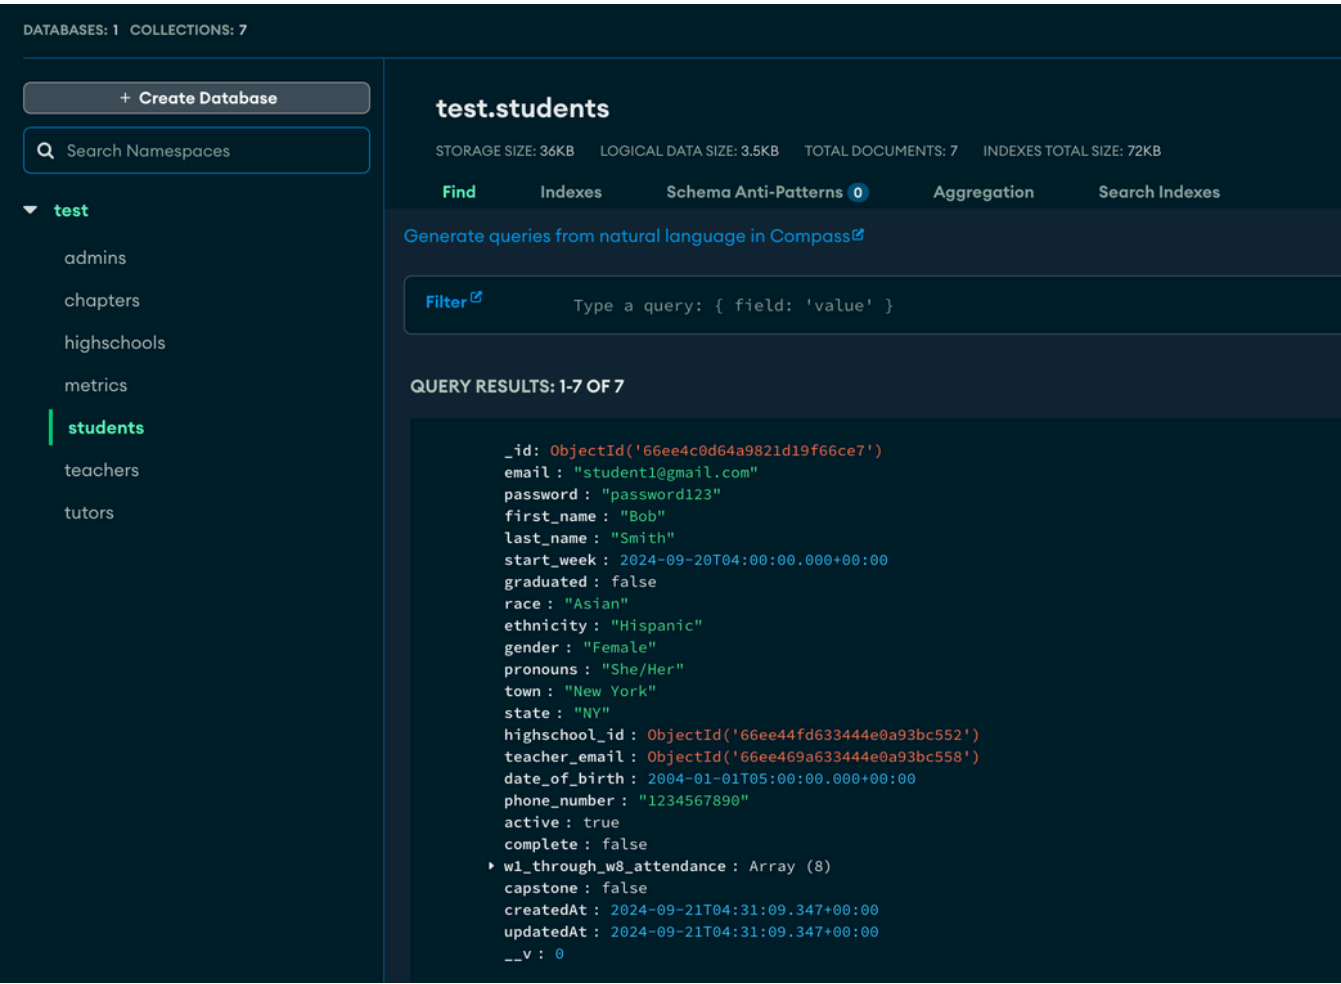

Organized a hierarchical web structure that dynamically adapts to user type and contains specific tabs on each user's dashboard, connecting to the DB

3. Features

Implemented complex features, integrating calendar scheduling, form response, ID image uploads, linked learning material, and a mobile app calculator

NEXT STEPS:

01

Automation: Integrating an autograder and match system for tutor ease.

02

Messaging: Built out multi-person communication system and forum.

03

Communication: Automatic email and text reminders for deadlines/forms.

04

Curriculum: AI-based practice tools.

THANK YOU!
